EDUCATION

RMIT University

Master of Information Technology

Melbourne, VIC

Jul. 2023 – Dec. 2025

SRM Institute of Science and Technology

Bachelor of Computer Science and Engineering

Chennai, Tamil Nadu, India

Jul. 2019 – May 2023

EXPERIENCE

AI/ML and Cloud Engineering Intern

Australian Red Cross Lifeblood

July 2025 – Nov. 2025

Melbourne, VIC

- Built RAG-based chat application using AWS Bedrock, vector search, cosine similarity for natural language querying of research data.
- Developed proof-of-concept for semantic search and information retrieval using LLMs and vector embeddings.
- Worked with AWS (Lambda, S3, DynamoDB, VPC), IAM roles, CI/CD, GitHub, Agile development.
- Project selected for University Project Expo 2025.

PROJECTS

Azure Infrastructure Monitoring and Support Lab

June 2026

- * Deployed and configured Windows Virtual Machines in Microsoft Azure.
- * Configured Virtual Networks, Network Security Groups (NSGs), remote access and connectivity settings.
- * Used Azure Monitor and Azure Log Analytics to investigate system events and troubleshoot operational issues.
- * Gained hands-on experience with Windows environments, networking fundamentals and infrastructure monitoring.

OSI Model Networking Article (LinkedIn)

[Article Link](#)

- * Published a LinkedIn article explaining OSI Model, TCP/IP networking fundamentals.

CERTIFICATIONS

CompTIA A+ Core 1 (220-1201) Full Course

[Credential Link](#)

CompTIA Network+ (N10-009) Full Course

In Progress

Cisco Networking Academy - Linux Unhatched

[Credential Link](#)

Microsoft Certified: Azure Administrator Associate (AZ-104)

In Progress

Explore a Career in Database Development

TECHNICAL SKILLS

Technical Support: Hardware Troubleshooting, Software Installation, End-User Support, System Diagnostics, Operating System Configuration

Operating Systems: Windows, Linux (Ubuntu), CLI, SSH, User and Group Management, Basic System Administration

Networking: TCP/IP, OSI Model, IP Addressing, Subnetting, DNS, DHCP, Routing, NAT, HTTP/HTTPS, VPN Fundamentals

PC Hardware: PC Building, Hardware Troubleshooting, RAM and SSD Upgrades, Component Installation

Cloud Platforms: Microsoft Azure (Virtual Machines, Virtual Networks, NSGs, Azure Monitor, Log Analytics, Entra ID), AWS (Lambda, IAM, VPC, S3, DynamoDB)

Monitoring: Azure Monitor, Azure Log Analytics, Event Investigation, Infrastructure Monitoring

Scripting: Python, Bash, SQL

Tools: Git, GitHub, VS Code
